Court A | installed lighting correction

Matched native walking-eye views - 6 October 2026

BEFORE

Retained native baseline

PNG SHA256: ac883fda939a9de22e40b1f4

INSTALLED

Actual saved world increment

PNG SHA256: 9c7eeb3a37649f8188d42a31

A bounded, verified improvement

The counter and planted-base area read more clearly. Seating and surrounding architecture still need work.

Same 1.65 m eye height, 72-degree vertical view, exposure and current game effects.
One retained lamp: 7.9 m reach, 0.8 energy, unchanged cone and local source selection.
Only its source-backed lens insert and aim changed. Existing furnishings, planting and other lights are retained.

Verified: exact imported mesh/material/texture correspondence, structure, 169.4 m Court walk and loaded-cart route.
This is a local optical increment. It is not finished Court art, auditorium sightline acceptance or a full regression pass.
