ASTRAEA CURRENT SHIP LAYOUT

18 decks. One continuous liner. The geometry in the game so far.

01 OCT 2026

WORK IN PROGRESS

1,082 m length | 240 m maximum beam | 118 m reference envelope | 1,000 guest units | 2,000 guest berths | 400 crew berths

THE DECK STACK

Floor elevations are exact; row spacing is an index.

		UNITS / GUESTS
18	**Bridge & navigation** Floor +106.5 m	-
17	**Premier suites & horizon** Floor +102 m	100 / 200
16	**Family gardens & skyline** Floor +97.5 m	200 / 600
15	**Adaptive habitat residences** Floor +93 m	180 / 240
14	**Thermal-reef residences** Floor +88.5 m	240 / 550
13	**Quiet cocoon residences** Floor +84 m	160 / 260
12	**Panoramic gallery & library** Floor +78 m	-
11	**Theater & culture** Floor +69.5 m	-
10	**Grand dining & restaurants** Floor +61 m	-
09	**Retail promenade** Floor +52.5 m	-
08	**Aquatic recreation & wellness** Floor +44 m	-
07	**Sports & active living** Floor +35.5 m	-
06	**Grand botanical atrium** Floor +27 m	-
05	**Medical & species care** Floor +21 m	-
04	**Aquatic & arboreal habitats** Floor +16.5 m	120 / 150
03	**Crew quarters & operations** Floor +12 m	400 crew
02	**Engineering & life support** Floor +6 m	-
01	**Logistics & shuttle docks** Floor +0 m	-

ACTUAL PLAN FOOTPRINTS

Forward is left. Port is up. Each plan uses the same scale.

D09 Retail promenade

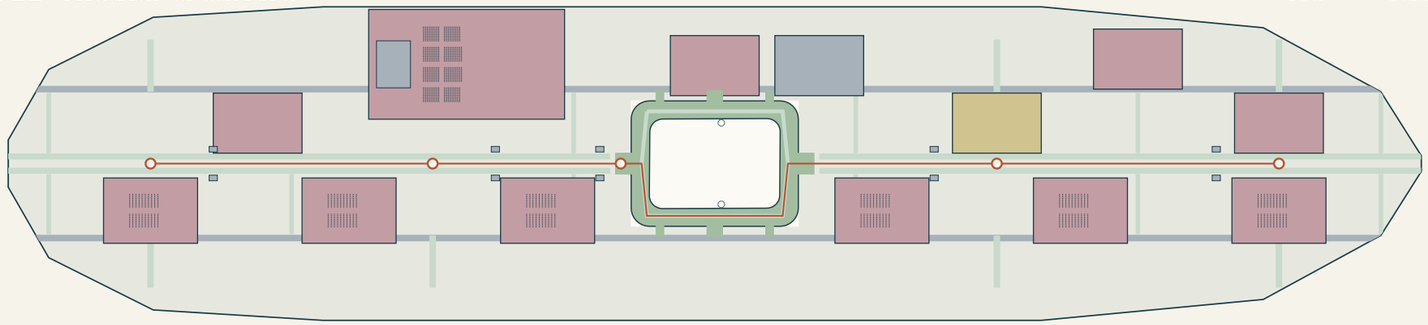

BOW < > STERN

100 small storefronts around the central leisure terrace

D11 Theater & culture

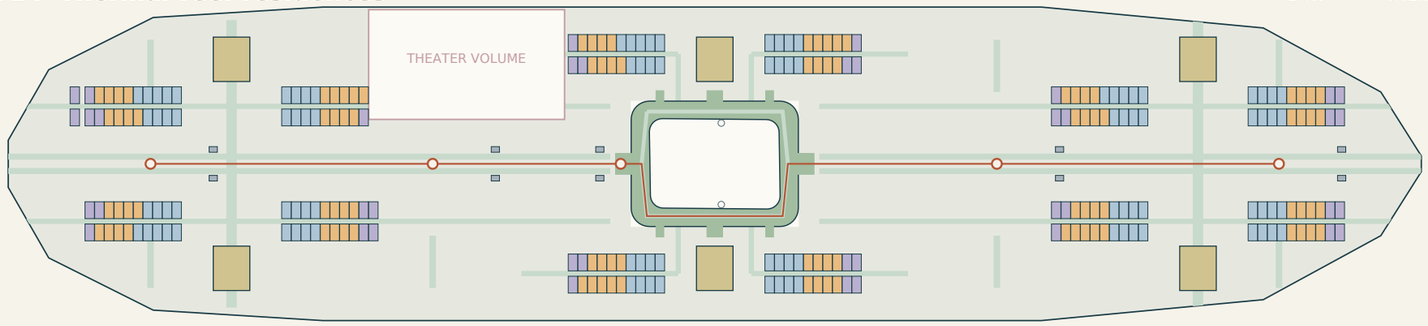

BOW < > STERN

Port-side theater volume and six starboard cinemas

D14 Thermal-reef residences

BOW < > STERN

240 units / 550 guests; center banks moved clear of the atrium

Standard | Family | Specialty | Crew | Public | Garden / habitat | Service / staff | Culture | Retail

Service-tram route + stops | Authored guest circulation | Open volume / floor cut-out

Room footprint colors describe function, not finish

Built footprints and floor openings are shown. Furniture, art and final playability are still being refined. Full deck plans and enlarged details follow.

How to read the current build

This is a spatial snapshot of the game, not a new proposal or a construction drawing.

WHAT IS ACTUALLY DRAWN

Room rectangles come from the live Godot room registry. Hull walls come from the authored hull stations. The botanical terraces use the actual per-deck inner and outer contours. Theater floor cut-outs and the service-tram path use their current implementation.

WHAT THE DIAGRAM SIMPLIFIES

Furnishings, wall thickness, lights, ceiling forms and most minor objects are omitted. Beds in enlarged residential details are anchor dots, not scaled bed furniture. Corridor ribbons indicate authored ground markings and access links; they are not an independent navigation certification.

WHAT IS STILL AN INTERFACE OR ARCHITECTURE

Service-tram travel follows the plotted route and carries the cart. Passenger Townline movement uses logical boarding, ride and exit states behind screened vestibules. Express deck travel is the usable inter-deck interface. Panoramic atrium lift towers are modeled architecture; they are not shown as functioning elevator cabins.

WHAT IS NOT BEING CLAIMED

This atlas does not certify pressure boundaries, evacuation, passenger operations, native Windows behavior or final visual quality. No proposed extra rooms, berths, decks or tracks were inserted to make the drawing look complete.

COORDINATES & MULTI-DECK SPACES

Horizontal on the page: Z, forward -541 m to aft +541 m.

Vertical on the page: -X, port at top and starboard at bottom.

Y is height: registry room Y values are relative to each deck floor.

The atrium slab opening is 96 x 128 m on D02-D17. The sculpted floor ring partly fills that opening; the pale interior is open volume.

The grand theater begins on D11. Its volume removes intermediate floor slabs on D12-D14. D12 and D13 have gallery entries.

RECONCILED CAPACITY

Standard doubles	300 units	600 guests
Family triples	300 units	900 guests
Specialty singles	300 units	300 guests
Specialty doubles	100 units	200 guests
Total guest accommodation	**1,000 units**	**2,000 guests**

Crew is separate: 200 ordinary crew cabins contain 399 beds, plus the employee cabin has one bed. Total: 400, including the player.

SOURCE SNAPSHOT

Extracted directly from the main build: 1,462 registered spaces. Source files: ship.gd, auditoriums.gd, living_atrium.gd and full_game.gd; names and berth intent checked against SHIP_DESIGN.md.

Snapshot: 1 October 2026, 01:07 UTC. Small layout refinements may follow as the main build continues.

D01 Logistics & shuttle docks

Cargo, provisions, synthesis, laundry and repair

FLOOR +0 m

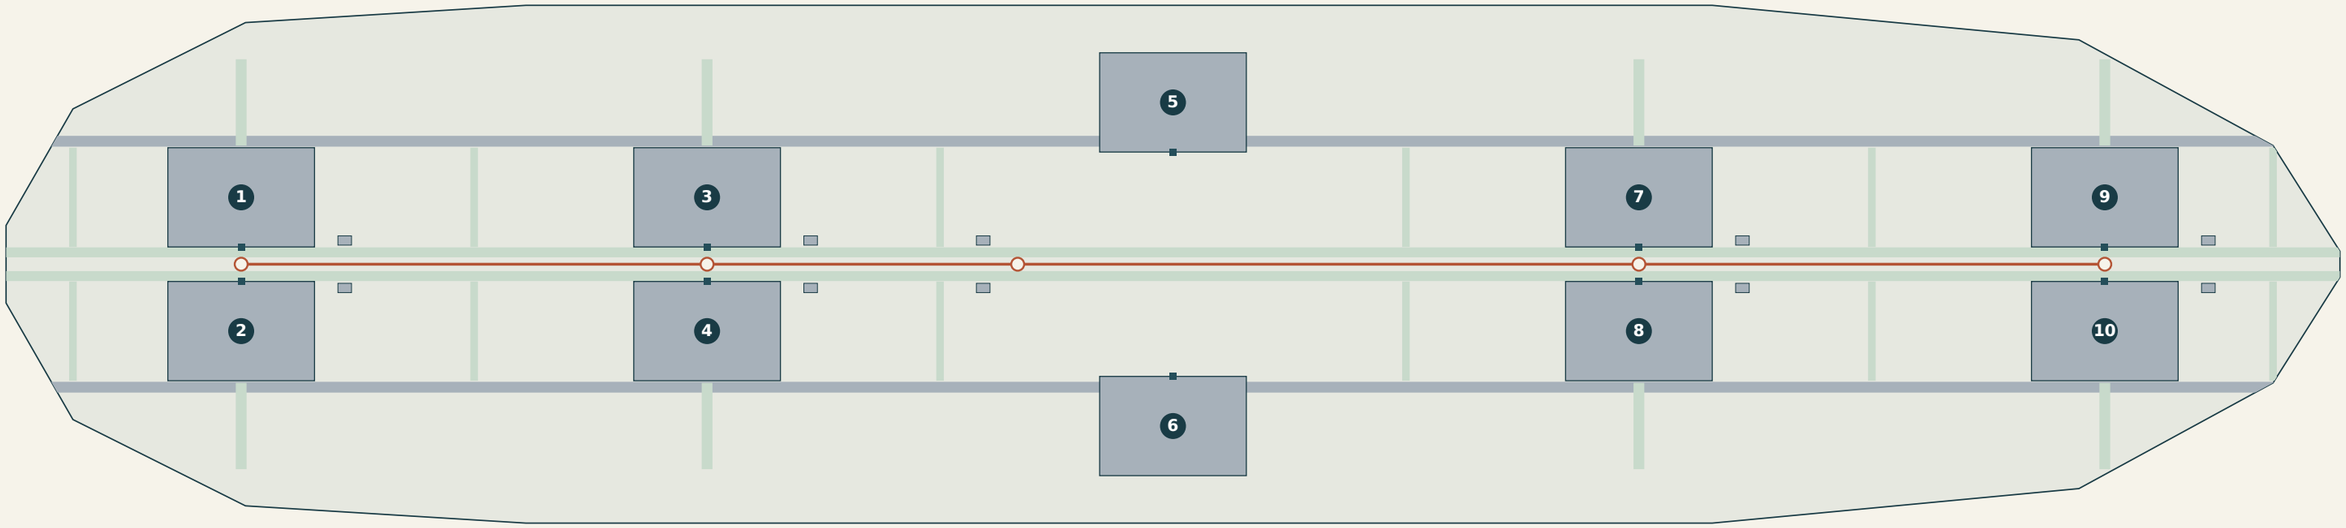

10 registered spaces

Standard | Family | Specialty | Crew | Public | Garden / habitat | Service / staff | Culture | Retail

Service-tram route + stops | Authored guest circulation | Open volume / floor cut-out

Room footprint colors describe function, not finish

FORWARD / BOW (-Z) PORT UP (-X) **AFT / STERN (+Z)**

0 100 m STARBOARD DOWN (+X) | All distances in metres | Room numbers refer to the directory below

DESTINATIONS & CAPACITY

01 Shuttle arrivals

02 Cold provisions

03 Housekeeping & laundry

04 Cargo exchange

05 Food synthesis

06 Repair workshop

07 Reclamation plant

08 Cargo dispatch

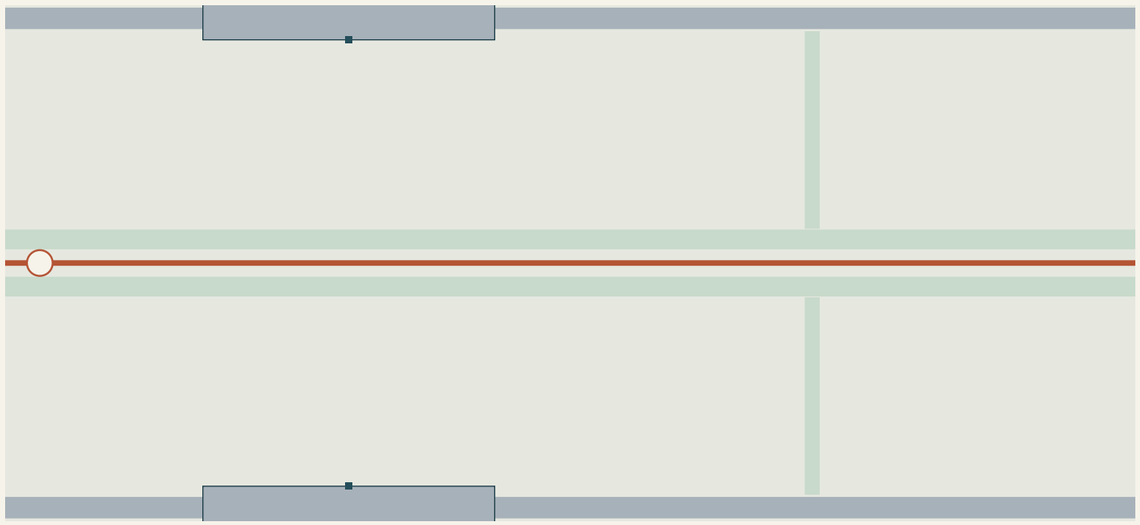

09 Shuttle concourse

10 Custodial depot

The logistics and synthesis spaces are functional game rooms, not a complete real-world freight or industrial plant design.

CENTRAL SERVICE STREET

Straight axial tram route on this deck

0 20 m

Detail extents: Z -80 to 80 m; X -60 to 60 m

D02 Engineering & life support

Fusion, water, atmosphere and power systems

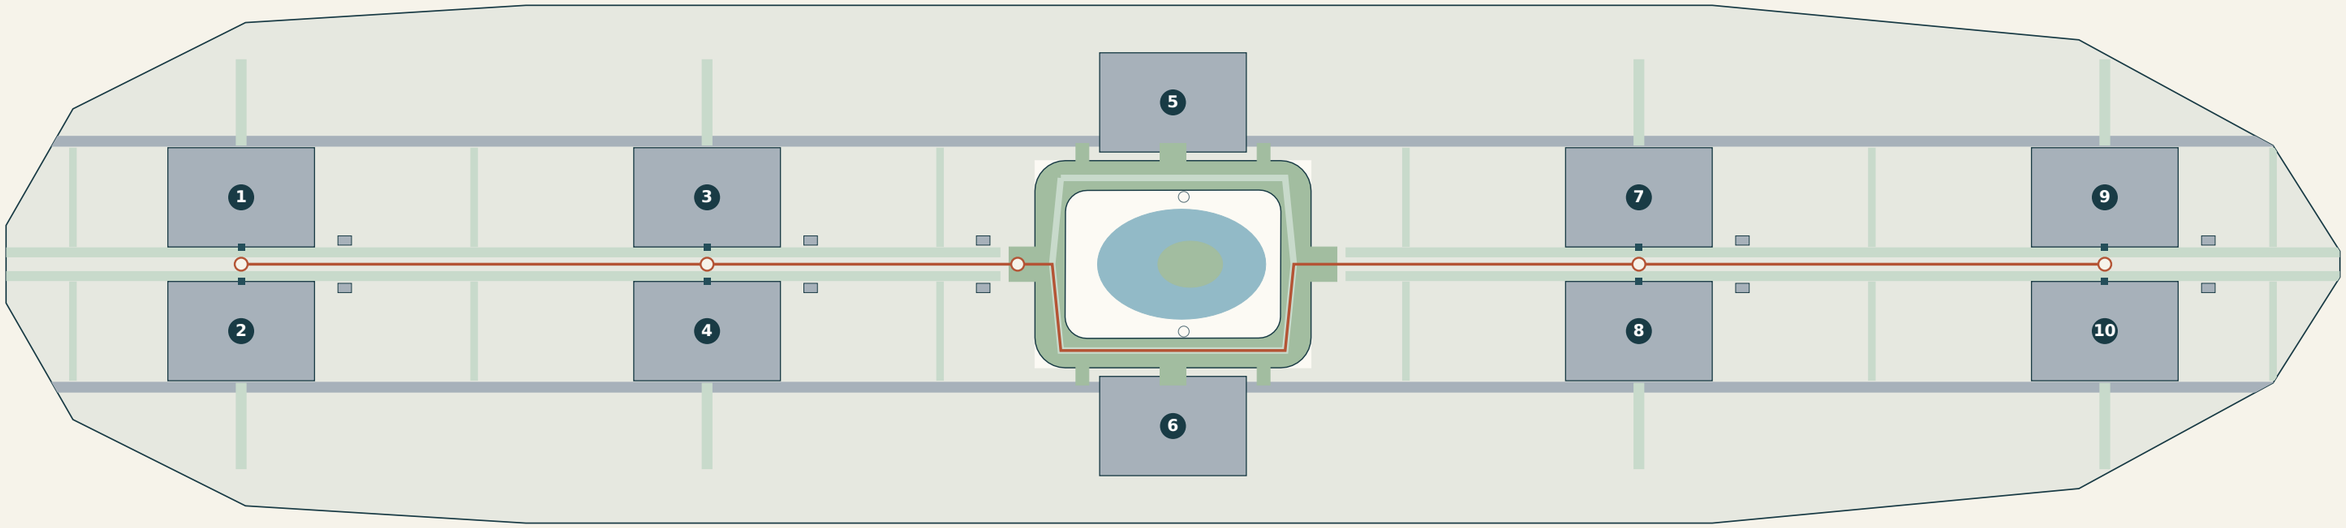

FLOOR +6 m

10 registered spaces

Standard · Family · Specialty · Crew · Public · Garden / habitat · Service / staff · Culture · Retail

Service-tram route + stops · Authored guest circulation · Open volume / floor cut-out · Room footprint colors describe function, not finish

FORWARD / BOW (-Z) PORT UP (-X) **AFT / STERN (+Z)**

0 100 m STARBOARD DOWN (+X) | All distances in metres | Room numbers refer to the directory below

CENTRAL SERVICE STREET

Straight axial tram route on this deck

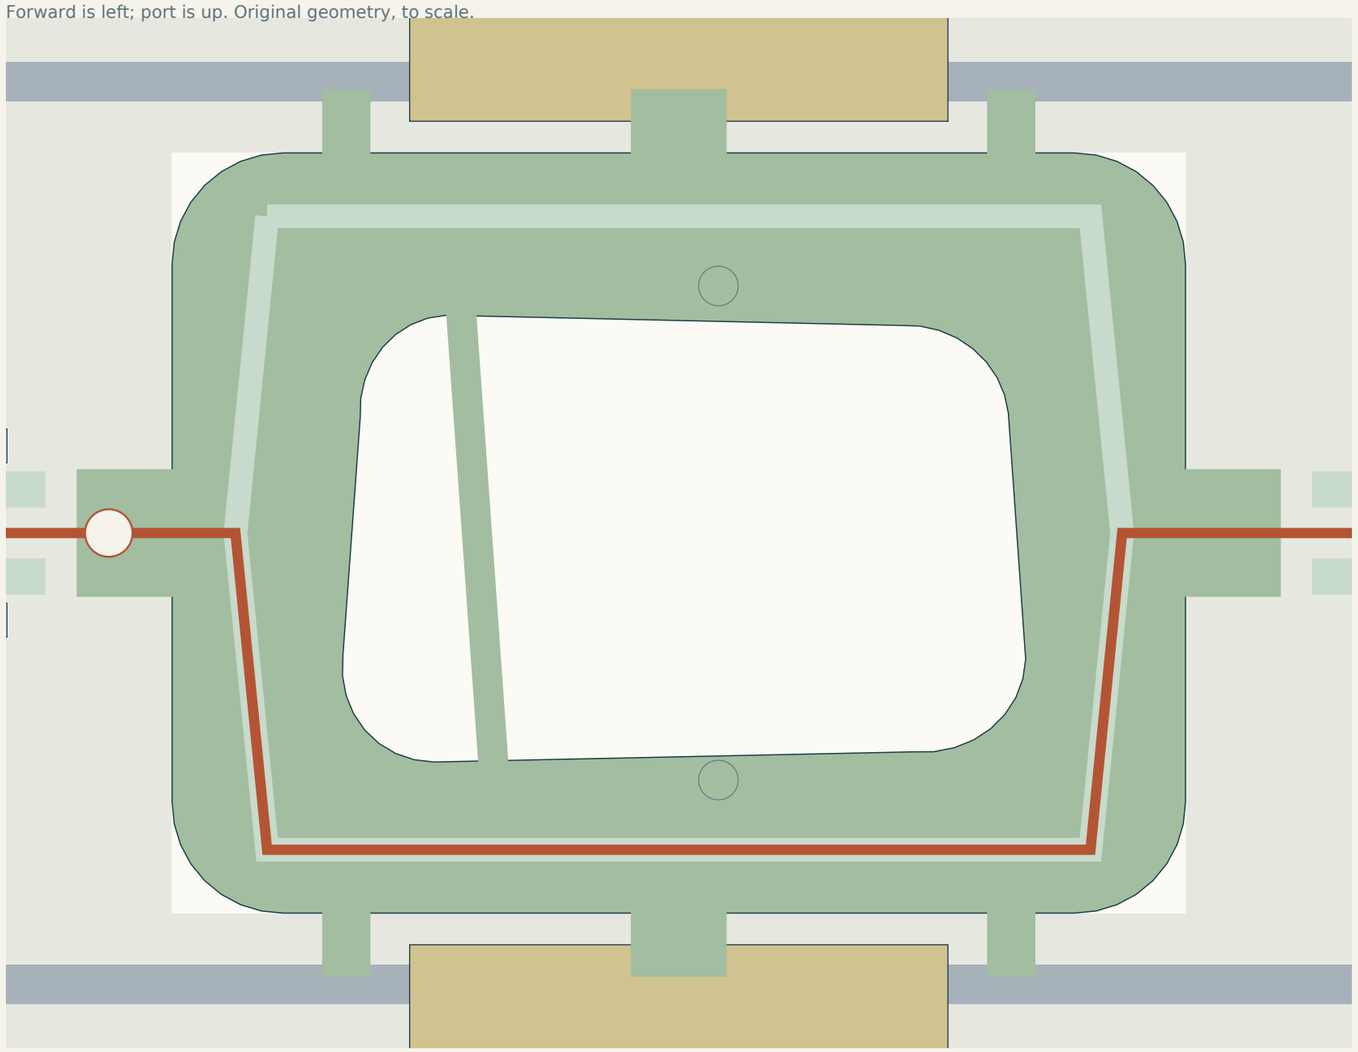

0 20 m Detail extents: Z -80 to 80 m; X -60 to 60 m

The new central atrium & transit

A real open volume, with sculpted terraces and a service-tram route around the starboard edge.

D09 TERRACE PLAN

Forward is left; port is up. Original geometry, to scale.

96 x 128 m

Rectangular slab opening on D02-D17; rounded, sculpted terraces replace the navigable perimeter.

16 visible levels

Four broad leisure terraces: D06, D09, D12 and D16. Twelve smaller connecting galleries.

Clear central void

No former full cross-bridge grid. Optional narrow crossings exist only on D09 and D12.

Starboard tram bypass

X/Z route: (0,-72), (0,-56), (40,-52), (40,52), (0,56), (0,72).

Five Townline stops

Z = -432, -216, -72, +216, +432 m. Central express arrival is X +5.5, Z -72 m.

Distinct lift meanings

Hollow circles in the plan are panoramic lift architecture. Express deck travel remains the working inter-deck interface.

DOORS, PORTALS & SUPPORT

Fore/aft entry aprons are 16 m wide. Side portals join the perimeter at X +/-52, Z 0. Extra cross-street portals at X +/-52, Z +/-42 connect the crew, retail and residential sides. These diagrams preserve that revised geometry.

The floorplan shows the current ship so far. Visual review, normal-play walkthroughs and final packaging remain separate completion checks.
